Magic Card

The secret to the magic card is the pocket in the card base. The slider has two parts: a stamped image on a window sheet and the same stamped image, colored, on a piece of cardstock. The slider pieces are attached at the top only. When inserted in the card base, the window sheet goes over the front of the middle pocket and the cardstock goes behind it, so that they come together as you pull the slider up, out of the card base.

Magic Card Tutorial

By Julie Davison, www.juliedavison.com

1. Start with an 8 1/2" x 11" piece of cardstock. Score in quarters (at 4 1/4" and turn to score at 5 1/2")
2. Cut off the bottom left quarter, "C" in the diagram.
3. Trim 1/4" off the bottom and 1/8" off the inside side of square "D". This flap will fold up and be in the middle of your Magic Card.
4. Use the Circle Scissor Plus or a punch or make a window in square "A". This will be the front of your card. (Note: In the diagram, the front of the card is the BACK side of square A.)
5. Optional: Punch a half circle notch at the top of Square "A" in the center about your window.
6. Line up the 3 1/2" x 5" piece of cardstock (for the slider) in the window so the top edges meet. Stamp your image in the center.
7. Remove slider from card and line it up with a window sheet cut to the same size. Use the Stamp-a-ma-jig to stamp the image again on the window sheet. (Use Staz-On ink on the window sheet.)
8. Color the image on the cardstock. Use a thin line of 2-way glue to adhere the top of the cardstock to the top of the window sheet. (Or use a small amount of SNAIL adhesive in the center.) Make sure the images line up and trim extra window sheet/cardstock if needed.
9. Optional: Use the circle punch to create a tab for the slider. Fold it in half at the top of the slider and adhere with a sticky strip. Add a staple, eyelet, or brad, if desired.
10. Fold the card base. First, fold square D up on to square B. Then fold Square A over (like you would on a standard card). Use strips of adhesive along the edges of the card so the slider has room to move up and down. (See photo for placement of three adhesive strips.) ** DO NOT adhere the top of the card shut!
